

Please join us in making a difference together

Are you interested in providing a consumer perspective on how technology can improve the way we deliver the quality and safety of health care?

Northern Health is looking for community members to join the new Digital Investment Steering committee & the Electronic Medical Record (EMR) implementation project.

We will be focusing on the intersection of the EMR and patient workflows and how best this can be implemented and communicated to consumers.

Our staff will support you to join meetings and workshops online to participate from the comfort of your own home.

Your experience of receiving health care as a patient or carer is essential.

An interest in project management and communication is desirable.

Your ability to share ideas, listen, and be objective will be valued.

Support and training will be provided.

Medical knowledge is not required.

If you have an interest in how technology can improve the experience of patients, carers and families with a person-centred care focus, please get in touch with us.

To apply, contact: **Sherrilyn Ballard**, Consumer Participation Coordinator
